DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 1) Claims 1-3, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "said glass fibre" in line 2. Claim 1 recites the limitation "said organic coating" in line 4. Claim 1 recites the limitation "the coating liquid" in line 6. Claim 1 recites the limitation "the liquid coating composition" in line 7. Claim 2 recites the limitation "the liquid coating composition" in lines 2 and 4. Claim 2 recites the limitation "the place" in line 3. Claim 3 recites the limitation "said glass fibre" in line 2.

There is insufficient antecedent basis for these limitations in the above claims.

Also, it appears that reference is made both a coating material and a coating composition. Consistency of terms is required.

Claim 2 should start with -The- in place of "A".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1731

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2) Claim 3 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Joechem ("High-Speed Bubble-Free Coating Of Optical Fibres On A Short Drawing Tower", 10/1/1985) or over Deneka (4,792,347). Joechem and Deneka disclose an optical glass fiber drawn from a preform and transported through a liquid reservoir where it is being coated by an organic coating liquid and then flushed with a gas (Joechem, entire document) (Deneka, col. 9-10, lines 1-32).

In the event any differences can be shown for the product of the product-by-process claim 3, as opposed to the product taught by the reference Joechem or Deneka, such differences would have been obvious to one of ordinary skill in the art as a routine modification of the product in the absence of a showing of unexpected results; see also In re Thorpe, 227 USPQ 964 (Fed. Cir. 1985).

Allowable Subject Matter

3) Claims 1-2, would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter:

The primary reason for indicating allowable subject matter is that the cited prior art does not show a method for coating an optical glass fiber, wherein nitrous oxide gas is conducted over a preform after said preform is coated with an organic liquid (claim 1).

Conclusion

4) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Halpern whose telephone number is 703-305-4522. The examiner can normally be reached on Mon-Fri, (9:00-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Griffin can be reached on 703-308-1164. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0651.
